Department of Technical  
Education, Salem, India  
2003-2006

## E X P E R I E N C E

### Specialist

May 2022 | Lnt Infotech | Coimbatore,India

I lead a team of 3 API developers where we create API services developed in Microservices architecture that communicates to another one of Client's data source and produce responses. The portal creates engagements by uploading the relevant data bulk/partially. These engagements are further approved by the engagement partners team. The approved engagements are further stored back to the client's data source again.

### Application Development Team Lead

July 2021 - May 2022 | Accenture,India

I have led the team of four with Angular and AspDotNetCore API as a backend specialized team to the successful delivery of the iAPM project. iAPM helps the customer to assess their projects functionally and cost wise. I have also done the data anonymization and Sonarcube integration in devops pipeline for ICS project. And I have created APIs which creates excel sheets of data for the Azure Appinsights.

### Senior Associate

Sep 2019 - Jul 2021 | CTS, Chennai, India

Successfully led a project of creating a production like environment. Successfully formed a team for enhancements work and led them for many successful deliveries. Did proof of concepts with Azure Chatbot and data analysis and presented them to the clients. Initiated cloud migrations with containerization concepts. Collecting the enhancements and features list and prioritize them based on the Business needs. Analyze and design them considering the release date. Take each items through test phases like QA, Stage, UAT and Production. Production support. Technical assistance to the team. Driving daily scrum call with internal team. Driving daily client call to discuss on the progress. Release and deployment management starting from Creating the code branch, assigning tasks to the team, checking in the code, configuring the pipeline from the repository to different environments. Deployment support with the Server management team. Monitoring and supporting to ensure applications stability across all the environments.

### Dotnet Developer

Dec 2018 - May 2019 | NextGen Webservices Ltd, Coimbatore, India

Create and assign tasks for both internal and external resources, monitoring and managing their daily schedules in real time. I worked as End to end module developer.

### Associate Engineer

June 2016 - Nov 2018 | AJ Tech Research Labs, Coimbatore,India

Below are the projects that I have worked from scratch for various clients. 1. Python automations. [Sales Analysis, Future predictions, PDF to Audio, repetitive Emails and WhatsApp messages sending, QnA chatbot, Speech recognition projects] 2. MERN stack and Angular applications. 3. ChatBot(Azure QnA maker)
